VOLUME 3, NUMBER 1

MARCH 1, 2007

Move your foundry forward in 2007:

Call us to help you comply with MACT regulations easily and economically

Visit www.letcast.org for information on the economic and environmental benefits of low emission technologies

Attend the AFS Casting Congress in Houston May 15-18 and visit with us in the LETCAST booth

Learn about the latest research on Sonoperoxone® in an article entitled "Effects of Advanced Oxidation on Green Sand Properties via Iron Casting into Green Sand Molds" in Vol. 40, No. 9, 2006 Environmental Science & Technology. Jim Furness co-authored the paper with Drs. Fred Cannon, Robert C. Voigt and Sridhar Komarneni of The Pennsylvania State University.

PNEU COL™ SYSTEM

PHOTO TAKEN AT FNI FACILITY IN KY

CALL 859-873-0328 FOR DETAILS ON PNEU COL™ SYSTEM CUSTOM DESIGNED FOR YOUR FOUNDRY

Our most recent bond recycling system will be installed for start up at Grede Industries Inc. Liberty Foundry in Wauwatosa, WI. during Spring 2007.

Call us and your foundry can join the list of successful innovators using Sonoperoxone® and Pneu-Col™.

Penn State University continues its research into ways to achieve lower emissions and better economic returns in the foundry industry. Recent awards to faculty at Penn State will fund studies of both carbon management strategy and reclamation of waste green sand.
